

Bobbi Angell

ASBA *Live* IN NEW YORK!

28TH ANNUAL MEETING & CONFERENCE

Drawing Herbarium Specimens, Bobbi Angell

Thursday, October 20th, 9-12, Dutchess Room Westchester Marriott 2nd Floor,

We will focus on observing, understanding and learning to draw directly from pressed herbarium specimens. With instructions offered on how to recreate the plant structure as well as how to dissect and enlarge flower and fruit parts, we will design a composition that will define and depict a particular species. Pencil sketches can be transferred to Bristol board on a lightbox to draw in pen and ink. Examples will be shown of illustrations drawn for botanists from NYBG specimens for publication.

All levels welcome.

Materials List

Instructor will provide plant specimens *Paper for this class will be supplied courtesy of Legion Paper*

Students should bring:

2H pencils, sharpener and kneaded and plastic erasers

Symphyotrichum grandiflorum, Bobbi Angell
